

Capture the Perfect Smile!

Full Day Workshop with Rita Bauer

You will be amazed how quickly you can learn digital photography and get outstanding clinical photographs. We will show you the tips and techniques to consistently take excellent patient views with the use of retractors and mirrors.

Cameras and accessories for dental photography: From SLR's to high end Point and Shoot cameras, decide which digital camera is best suited for your practice and select retractors, mirrors, backgrounds and gadgets that make dental photography easy. Learn photographic principles to understand your camera and walk away with correct exposure set-up for your clinical pictures.

Patient Photography: Understand the standardized patient photographic requirements for dentistry, using the right retractors and mirrors.

Communicating with Digital Images: See how east it is to make a customized patient presentation for effective patient and marketing purposes in minutes.

**** This program is eligible for 6 credit points for Ontario dentists who attend.****

Guest Speaker: Rita Bauer

For the last 30 years, Ms Bauer has provided photographic material for educational purposes and taught clinical photography at the University of Toronto, Canada. With over 700 presentations and workshops on the subject, Rita has become recognized as a leading authority on the subject and now divides her time between the University and lecturing internationally. She specializes in making digital photography easily accessible for dentists and their staff, and in transforming inexperienced photographers into enthusiastic, competent digital camera users.

Refreshments and lunch will be served. **The course is limited to twenty attendees, so register today!**
